# KARABELO NTHOROANE

## TECHNICAL SOLUTIONS ENGINEER

083-690-7989
karabelonthoroane@gmail.com
COMPETENCIES
Software Development
Database Management
Networking
DevOps
Operating Systems
Version Control Systems
EDUCATION
Information Technology and Computer Science
Motheo TVET College
2020 - 2022
Included a diverse curriculum covering networking fundamentals, software development, and Cisco courses.
CS50x
HarvardX
2022 - 2023
Covered key concepts such as algorithms, data structures, software engineering principles, and web development.
LANGUAGES
Python
Java
SQL

CONTACT

#### PROFILE

I am a hardworking and motivated individual who thrives on collaborating with others. Honesty and dedication define my approach to tasks, and I consistently strive for excellence in all endeavors, valuing punctuality as a cornerstone of my work ethic. I am passionate about developing technologies that positively impact users, eagerly building projects and staying abreast of the latest technological developments. Engaging with like-minded individuals energizes me as I continue to expand my skills and experience, particularly in the media and gaming space, where I aim to make a meaningful contribution and foster positive change.

## WORK EXPERIENCE

## **Software Engineer**

Digistrads 2022 - Current

- Web Development: Created responsive websites utilizing HTML, CSS, and JavaScript to optimize user experience and interaction.
- E-commerce Development: Applied expertise in building e-commerce solutions, integrating functionalities such as shopping carts, payment gateways, and inventory management systems.
- Database Management: Proficient in SQL and database management, adeptly designing, querying, and optimizing databases.
- **Django Expertise:** Implemented Django frameworks proficiently to develop robust backend systems and intricate web applications.
- Cross-Platform App Development: Developed versatile applications across
  multiple platforms, leveraging Angular and Firebase technologies.
- GitHub Proficiency: Managed version control effectively through Git and GitHub, facilitating seamless collaboration and code management.
- Effective Communication: Established clear channels of communication with clients and team members to ensure project alignment and success.
- Project Management Skills: Orchestrated projects efficiently, ensuring timely delivery and client satisfaction through meticulous planning and execution.

#### Freelancer

Self Employed 2015 - 2022

- Versatility: Adaptability to handle a wide range of tasks and projects, showcasing flexibility and diverse skill sets.
- **Hardware Installations:** Expertise in installing and configuring computer systems, peripherals, and network devices.
- Client Communication: Effective communication skills to understand and meet client requirements, clarify expectations, and provide regular updates.
- Time Management: Experience in managing multiple projects simultaneously, prioritizing tasks, and meeting deadlines effectively.
- Customer Service: Providing excellent customer service by addressing client inquiries, concerns, and feedback promptly and professionally.
- Self-Motivation: Demonstrated self-motivation and initiative in pursuing freelance opportunities, managing workload, and continuously improving.
- Testing and Debugging: Ability to test and debug software applications to ensure functionality and identify and resolve issues.
- Continuous Learning: Commitment to ongoing learning and professional development to stay updated with evolving technologies and industry trends.

#### KEY COURSE MODULES

#### CS50x

- · Algorithms and Data Structures
  - o Design & Implementation of searching and sorting algorithms
- Software Engineering Principles
  - Version control, GitHub and Debugging
- Web Development
  - o HTML, CSS, and JavaScript
- Backend Development
  - Python and Django
- · Database Management
  - o SQL
  - NoSQL
- **Final Project:** Developed a Python-based "Photo Booth" application utilizing OpenCV for facial detection and image capture functionality. The application employs real-time facial recognition algorithms to detect faces and trigger the camera shutter upon detection of a gesture, allowing for seamless and intuitive photo capture experiences.

# **Cisco Networking Academy**

- Cisco IT Essentials
  - Hardware and Software Fundamentals
  - Troubleshooting Techniques
  - o Computer Assembly and Disassembly
  - o Operating System Installation and Configuration
- Introduction to Cybersecurity
  - Security Principles and Concepts
  - o Common Cybersecurity Threats and Attacks
  - o Risk Management Strategies
  - Cryptography Basics
- Introduction to Networking (CCNA1)
  - Networking Fundamentals
  - o OSI Model and TCP/IP Protocol Suite
  - IP Addressing and Subnetting
  - Router and Switch Configuration Basics
- Programming Essential in Python
  - Python Syntax
  - Data Structures
  - o Object-Orientated Programming

## **Sol Plaatje University**

- NQF Level 5
  - Applications Development Foundations
  - ICT Fundamentals
  - Web Development I
  - Communication Networks Foundations
  - o Information Systems I
  - Programming I
